

# Amniotic Fluid Injections

Helping patients reduce pain and repair injuries — *without* surgery!

Amniotic fluid injections are 100% natural! This steroid-free treatment is inherently regenerative and can reduce inflammation. Made of the very components that promote growth inside the womb, amniotic fluid is rich in collagens, cytokines, hyaluronic acid, growth factors, and messenger RNA. These elements help your body to reduce pain, lower inflammation, and promote soft tissue healing. Amniotic fluid injections protect, cushion, and lubricate joints to help relieve pain.

*Use amniotic fluid to relieve joint pain caused by aging, injury, or chronic disease.*

## Amazing Regenerative Properties

Amniotic fluid is rich in over 200 growth factors and cytokines that signal your body to begin tissue repair.

Maybe you are suffering from chronic joint pain or osteoarthritis. Or maybe you have pain from a past sports injury, such as knee pain, tennis or golfer's elbow, or a torn rotator cuff. Even if you have been led to believe that surgery is the only answer, amniotic fluid injections are a great safe, effective, and non-steroidal option for you to consider. With hyaluronic acid to help lubricate your joints, as well as elastin and proteins for tissue and joint repair. You will start feeling better quickly!

## Your Insurance May Cover Amniotic Fluid Injections!

If you have tried and failed conservative therapy lasting 90 days or longer, your insurance may cover amniotic fluid injections! Our office accepts a wide variety of insurance plans. We are in network with Medicare, BlueCross BlueShield, UnitedHealthcare and more. Call us to find out if your insurance will cover injections for you.

## Amniotic Fluid Injections Treat These Conditions and More

Degenerative joint disorders such as:

- Sports injuries
- Osteoarthritis
- Joint pain

Inflammatory conditions such as:

- Tendonitis
- Fasciitis

Soft tissue injuries such as:

- Ligament & tendon sprains
- Knee pain
- Hip pain
- Muscle & meniscus tears

## FDA Says Amniotic Injections are Safe

*Amniotic tissue-based products have been used for a century!*

The FDA has certified that amniotic injections are safe. Nu Life Medical only uses amniotic fluid that is manufactured within an FDA Registered Facility that is also certified by The American Association of Tissue Banks.
