

Do Your Knees Hurt?

What would you do if the pain was gone?
You'll feel like yourself again — without surgery.

Are you tired of experiencing knee pain when you stand up, sit down, or walk?
Do you start looking for a place to sit down when you are out and about?
Have you reduced or stopped activities you used to do with ease?

Chronic knee pain can strike people of all ages — and we are here to help.

If you have been diagnosed with Osteoarthritis, you know the pain is caused by degeneration. You may have been told surgery is your only option, but we would like you to consider a minimally invasive procedure.

Advanced Arthritis Relief Protocol (AARP Program)

Guided Imagery + All-Natural Injection + Brace + Physical Therapy = Success

AARP can help you avoid surgery.

This non-surgical procedure begins with viscosupplementation. An all-natural substance is injected into the joint space of your knee to replace the lost lubrication. It is a great solution for you if you have not found relief from pain killers, medications, therapeutic exercise or even surgical interventions.

It is FDA approved, all-natural, helping you live a better life and feel better fast — without surgery!

Live Your Best Life

Beverly Hills (248) 952-9190 • Shelby Township (586) 200-8707

Here is what makes our protocol more effective:

We ensure 100% accuracy

We use breakthrough technology called fluoroscopy. This mobile x-ray machine allows us (and you if you choose) to see the joint through live imaging as the minimally invasive injection is administered. This guided imagery helps confirm the injection placement, ensuring 100% accuracy. Without the use of fluoroscopy, there is no guarantee the injection will be in the joint space, which could make the whole procedure useless and ineffective. We want you to get the best results possible by taking this extra, valuable step.

Take the load off

With the use of an offloading knee brace, we notice our patients meet levels of knee pain relief more quickly and effectively. In order for the injection in the joint to do its job, the joint should remain separated for a short period. We custom-fit you with a weight-bearing knee brace that increases the joint space and provides relief in combination with the injections. This brace is typically covered by most insurance plans.

You will be stronger

We will help you feel better so you can move! The final piece of this protocol is physical therapy. It will allow you to strengthen your joints and surrounding muscles. The physical therapy combined with the injections and an offloading knee brace will help alleviate your pain and get you feeling your best again. *You will be so glad that you did not opt for surgery!*

Free, no-obligation consultation!

If you are not moving the way you want to or knee pain is keeping you from living your best life, schedule your FREE, no-obligation consult with us.

Insurances Accepted

Our office accepts a wide variety of insurance plans. We are in-network with Medicare, Aetna, BlueCross BlueShield, Blue Care Network, Priority Health, HAP, and more!

In many cases, Medicare along with a supplemental insurance plan will cover 100% of the cost for your treatment. Call us today to find out if your insurance plan is accepted! We will always let you know your coverage before you begin.

What Patients Are Saying

"Nu Life Medical has helped my knee feel so much better. I love the staff, they are truly wonderful. I highly recommend this to anyone having knee problems."
~ Elaine

"Before I came to Nu Life Medical, my pain was severe. After my third visit, I put my cane and walker away. By the time I finished my treatment, I felt like a new man!"
~ Harwyn
